

# GROW TOGETHER

Planet Farms in 2020 built the largest and most advanced Vertical Farming plant in Europe, near Milano, in Cavenago di Brianza. After only one year, Planet Farms has laid the foundations for the construction of the second production plant, located inside a beautiful plant nursery in Cirimido, Northern Italy. The project is finally ready to scale up with significant improvements in energy and space efficiency.

## First results:

### WATER SAVED

88% vs greenhouse  
95% vs open field

### PESTICIDES SAVED

100% vs greenhouse and  
open field

### FERTILIZERS SAVED

95% vs greenhouse  
96% vs open field
